

Welcome to Great Lakes nation!!!

Thank you for your interest in becoming a member at Great Lakes Federal Credit Union where we can help you *Discover your Worth*. We believe our members are our greatest assets, as indicated in our Mission and Vision:

Mission:

We celebrate our member's financial success.

Vision:

We celebrate by understanding that each member may have a different definition of financial success. We will strive to understand each member's definition, and work with them within prudent industry standards, to help them achieve their goals.

Financial institutions don't lend out "their" money; they lend out their depositor's money. Anytime you lend out someone else's money, the institution has to follow certain rules, such as federal or state regulations. Even though most of the time, we have the ability to say "yes" to requests, from time-to-time we need to say "no".

We pledge to make every effort to say "yes" to our members' loan and savings requests to help them achieve their individual financial goals. Additionally, we work hard to keep our fees as low as possible to help keep more money in our members' pockets.

At Great Lakes Federal Credit Union, we keep our product offerings simple and you will not have to worry about having a product of the month pushed onto you. Also, you will not have to worry about having to wait for multiple special promotions each year to get the best deal. Our rates are special year round, because of us working hard to give you the best deal we can, regardless of the time of year.

If you are looking for an institution where you can have confidence that you are getting good rates and fair deals without having to wait or wonder if some special promotion is just around the corner, we invite you to start a relationship with us and let us earn the right to be your solution in helping you meet your financial goals.

Justin D. Ebel
Chief Executive Officer
